Digital Moisture Meter

Measures Moisture from 2 to 70% with High Accuracy (1.5%)

The Series MST-01 Digital Moisture Meter is a high accuracy instrument used for determining the moisture content in wood, gypsum, bamboo, paper and other various materials. This unit features a durable and rugged enclosure which ensures a long life span. The large digital LCD makes measurements easy to read, while the hold function makes them easy to record. The MST-01 includes a nylon carrying case, protective cap, two replacement pins and one 9V battery.

Model MST-01, Digital Moisture Meter
