

LIMIT SWITCHES SECTION

WORM DRIVE LIMIT SWITCHES

2 contacts A = 65 mm
3-4 contacts A = 90 mm

MAIN FEATURES

The worm drive limit switches, FCR type, are particularly suitable for controlling the stops of the lifting electric circuits on building cranes and bridge cranes.

The range includes, among the others, the limit switches equipped with up to 4 microswitches and respective adjustable cams, profile type 1 (standard - white coloured).

On request two other types of cams are available: the profile type 2 (grey coloured) or type 3 (red coloured). They are essential in any particular case to modify the operation chart.

The worm drive limit switches are furthermore supplied in two different versions: either with slow guaranteed opening switches (CEI 17.12 chapter 492) or with changeover quick break switches.

The outer casing is made of thermoplastic material with high mechanical and temperature variation resistance.

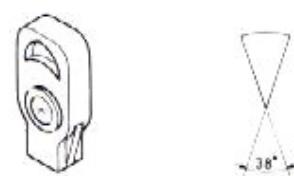

FURTHER FEATURES

Insulation voltage	250V~
Maximum exercise voltage	250V~
Grey coloured lower casing	RAL 8301
Yellow coloured cover casing	RAL 8260
Operating temperature range	-30 °C +70 °C
Drive	worm screw
Maximum rotation speed	1500 revs. per min
Cable entries	2 x PG 11
Insulation	according to VDE 0110 group C
Protection degree	IP 55 (CEI 70-1 chap. 519 IEC 529)
In compliance with rules:	IEC 337-1 337-1A CEI 44.5 chap. 729 VDE 0660 CSA ASE CEE 24
Protection against contact voltages:	double insulating (CEI 17.13 chap. 542)

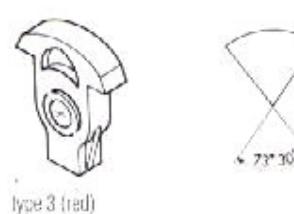

CAMS PROFILE

type 1 (white)

type 2 (grey)

type 3 (red)
